EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 11 through 24.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor suggests the application of a vaporizer wherein the gases that remain from the condensation step (mostly hydrocarbons) are heated prior to their introduction to the combustion chamber. This additional heating step, as claimed by the applicant, is taught to revaporize any remaining liquids (which are simultaneously collected) in order to enhance the oxidation of the subsequent step.

The previous rejection was on the grounds that the teaching of Miles provided this step in combination with the processes of either Choi or Anderson. However, it is clear that the vaporization of Miles takes place prior to the condensation of the mixed gas and thus does not represent the process being claimed. The prior art of record teaches the use of the gases that remain from the condensation step to provide heat to the reboiler via combustion, however, the heating of the gases prior to their use as fuel is not taught.
